

AIRBRUSH TANNING RECOMMENDATIONS

FDA RECOMMENDATIONS FOR AIRBRUSH TANNING WITH DHA

The FDA recommends that users should avoid ingesting or inhaling products containing DHA. This includes exposure to the eyes, lips, mucus membranes or internally. When receiving an airbrush tan it may be difficult to avoid exposure.

The FDA and Sol Potion recommend that you take the following measures to protect against ingestion or inhalation during your sunless session by using:

- ☛ Protective eyewear
- ☛ Nose filters
- ☛ Sealing lips with lip balm
- ☛ Protective undergarments

Please request these items from your airbrush technician.

If you have additional concerns or want to review the complete FDA stance on DHA, please visit www.FDA.gov and search “DHA Spray Tan”.
